

1. **Tell us about your personal story of transformation?** It began when I asked the question, does God exist? I was 18 and I just graduated from high school. I didn't have many friends and wasn't popular. I was passionate about music. In fact, I was in a hard rock band and submerged myself in music. In July of 2001, a bomb exploded near me and my hearing was damaged and music was no longer an option, it took me off my music path. This left me wondering, what next? I questioned everything and wanted to know how this universe works. This led me to take every course at the community college regarding the universe and spirituality. In August 2001, I was given a journal for my birthday. I was in bed thinking about what to write in it. At that time a power and presence came into the room. The physical lights in the room got brighter like something out of a movie. This presence began speaking to me, "You will follow me sooner or later. This will decide when you will begin the next step to mastery, take my hand." The voice went on and on and told me my purpose, where I was going, as well as teachings and universal principals. At that point forward, I was led by this presence every day. Not only was I given the ability to communicate with spirit but to impart this ability to others so people may have a tangible relationship with their creator.
2. **What motivated you to step into the world of personal growth?** I lived many years with chronic illnesses such as fatigue, migraines, blacking out, hypoglycemia, tonsillitis, bronchitis doctors were throwing tons of prescriptions at me to see what would work and nothing was helping me. When I chose to follow this divine spirit my health transformed. Within six months I was healed of all illness. The voice continued to teach me, guide me and heal me. I was shown the root cause of these physical symptoms and empowered with the innate abilities of my soul to cure them. Something inside me knew that this was truth and it was exactly what I needed to do.
3. **Tell us about your book release, "Age of the Soul."** Every day for 30 days during the last part of 2005, my teacher, Katherine Beck, and I would have phone meetings where a different spirit would channel and give a lesson. One of the spirits on one of the days, Rohan, an archangel came to me in a spiritual meeting I was holding and said, "Jason it's time for us to start our work together. Our work is going to include seven books the first will be called, Age of the Soul." I thought I'm not a writer, I've never written before. Rohan told me not to worry and to sit at my computer and type and he would do the work for me. I sat at the computer and kept typing until my hands hurt. This continued daily for several weeks until I had a book. All I remembered is I have no outline, I have no plan. How could this make sense? Surprisingly, it not only made sense it became a simple, practical, fresh look at how anyone can live their souls purpose and be empowered with the natural abilities that lie within the soul.
4. **Where is the spirit world?** Right here coalesced with the physical world. Most people just don't see or feel it. It's important to give yourself permission to imagine it and allow access to this other world.
5. **How can someone raise their vibration level?** Listening to their spirit. Your spirit will tell you exactly what to do. When you begin to listen to your spirit and follow its intuitive guidance you will automatically raise your vibration level ideally to the frequency of love.
6. **What are the first steps we can take to heal ourselves?** The first thing we must do is change our viewpoint of healing. Everything we experience is an opportunity to know ourselves better. There is a reason for everything that happens to you.
7. **There's a shift within the universe that everyone is talking about. What is this shift?** The great shift upon us now has been called by many names. It is the Age of the Soul where humanity is reacquainting themselves with the soul or spirit, aligning with its purpose and manifesting its divine love. We are encouraged to go within to listen to our intuition and communicate with our spirit guidance and use our soul's natural ability to heal. 2012 is a hallmark for this great change.

8. **You also mention a veil between both worlds that is getting thinner as time progresses. What does that mean?** The physical and non-physical universe coexists together. However, there is an energy that gives the appearance they are separate. This energy is the veil between them. The veil is changing, allowing one to tap into the non-physical. Soon everyone will be able to perceive this non-physical universe or world.
9. **Can anyone speak to spirit?** Yes. Spirit is already speaking to everyone, so all we need to do is imagine what they are saying and talk back because spirit communication is accessed by our imaginary creative mind.
10. **What is your message to the world?** There is hope! Times are changing, people are changing just look around you. We're all moving into our true spiritual existence. Deepening our relationship with spirit not only gives us the guidance we need in our life but connects us with the unconditional love that we are truly seeking.
11. **How is your message different than other spiritual teachers?** Simpler, down to earth and accessible to everyone.
12. **What are you working on right now?** My third book, "World Peace in One Generation" which shows humanity how to unify and attain global peace.
